CONTENTS

PART 1—JANUARY 1950

PAGE

Closure of cranial articulations in the skull of the Australian aborigine. By A. A. Abbie 1

The flexor muscles of the forearm and hand in lizards and mammals. By R. Wheeler Haines 13

Differentiation of mammalian epidermis in tissue culture. By Jean Hanson 30

Histochemical changes produced by cold and adrenaline in the suprarenal cortex of the adult male rat. By Frances B. Robinson and J. M. Yoffey 32

Growth of nerve implants in voluntary muscle. By J. T. Aitken . . 38

A note on the specificity of the corneal epithelium. By R. E. Billingham and P. D. Medawar 50

Reviews 57

Proceedings 60

PART 2—APRIL 1950

The development of the azygos veins in the albino rat. By H. Butler . 83

The pronephros and the early development of the mesonephros in the duck. By J. Davies 95

The staining of nerve fibres in paraffin sections with silver. By G. J. Romanes 104

The relation of the direction of the mental foramen to the growth of the human mandible. By R. Warwick 116

A description of the coronary arteries in Dipnoan fishes and some remarks on their importance from the evolutionary standpoint. By G. E. H. Foxon 121

Electromyographic study of patterns of activity of the anterior abdominal wall muscles in man. By W. F. Floyd and P. H. S. Silver . . 132

An experimental study of the visual pathways in a reptile (*Lacerta vivipara*). By J. A. Armstrong 146

A critical evaluation of methods used to demonstrate tissue neural elements, illustrated by reference to the cornea. By G. Weddell and E. Zander 168

Cytological and histochemical variations in the adrenal cortex of the albino rat. By A. J. Cain and R. G. Harrison 196

Obituary Note 226

PART 3—JULY 1950

PAGE

On the prenatal growth of the mammary gland rudiment in the mouse. By B. I. Balinsky 227

Comparison of fracture repair in the frog, lizard and rat. By J. J. Pritchard and A. J. Ruzicka 236

Effect of malnutrition as compared with hypophysectomy on organ weight of the albino rat. By L. M. Rinaldini 262

The gradient of mucosal surface area in the small intestine of the rat. By R. B. Fisher and D. S. Parsons 272

The intramural blood supply of the upper jejunum in man. By F. S. A. Doran 283

The development *in vitro* of the submandibular and sublingual glands of *Mus musculus*. By Elio Borghese 287

Explantation experiments on the influence of the connective tissue capsule on the development of the epithelial part of the submandibular gland of *Mus musculus*. By Elio Borghese 303

The fate of the nerves of the deciduous teeth. By A. Mohiuddin . . 319

Reviews 324

Books received 325

Obituary note 325

PART 4—OCTOBER 1950

A method for the study of arterial anastomoses. By D. A. McDonald and J. M. Potter. 327

Sources of arterial blood supply to the superior and middle cervical sympathetic ganglia and the ganglion intermédiaire. By E. L. Patterson 329

The relationship between internodal length and growth in human nerves. By A. D. Vizoso 342

An experimental study of the fornix in the rabbit. By James M. Sprague and Margaret Meyer 354

Alkaline and acid phosphatase distribution in normal and regenerating tadpole tails. By L. C. U. Junqueira 369

The local action of vitamin A on bone. By N. A. Barnicot 374

The development *in vitro* of the mammary glands of the mouse. By Margaret H. Hardy 388

Anatomical note. By F. K. Sanders 394
